

ANCIENT CIVILIZATIONS

TELESCHOOL LESSON MAY 6

Remember to join the Microsoft TEAMS Meeting at 10:00 a.m. on Wednesday morning with your TAG teacher. We'd love to see you! We will also record the meeting if you miss it.

EQ: How can I show what I have learned about my ancient civilization?

Hello archeologists! Welcome to your final TAG lesson for the year! This week you will be working on your final project for our Ancient Civilization unit, your museum! Your museum exhibit is due next week, Wednesday May 13th. We will take turns during our 10:00 Teams meeting that day to share our museums. We can't wait to see what you've created!

Where do I start today?

Use the links on the [TAG website](#) to gather a little more information about your ancient civilization. We linked some helpful articles for you. We also sent the articles to your TEAMS files. Only read the article for your civilization. They are titled, "Ancient China Article, Ancient Greece Article, Ancient Rome Article, and Ancient Egypt Article."

If you'd like, you can jot down some notes for yourself using bullets on a piece of paper. Here's a great way to do that:

Topic	My Notes
Buildings
Inventions
Daily Life

If you'd prefer, you can also print the articles out for yourself and highlight important information as you read them. Do whatever works for you! Do not spend too much time taking notes, or you will not have time to work on your museum.

After you have finished reading your article, go ahead and work on your museum. Here are some ideas to get you started on it! Remember, they will all look different. Be creative and have fun with this!

What will my museum include?

- ✓ Information about the excavation (year, famous archeologist)
- ✓ An example of the writing
- ✓ A picture and information about a famous leader, building, place or invention
- ✓ Information about the daily life there

Any other information that you have learned about and would like to share about your Ancient Civilization.

What will my museum look like?

- It could be a drawing.
- It could be a PowerPoint.
- It could be 3-D (diorama)
- Use your imagination!
